A few words about Living School

Living School is a private, innovative primary, elementary and middle school created in 2007 to foster, through education and development of its staff and students, the emergence of responsible and fulfilled citizens into the world, contributors to a true evolution of humanity

Living School is an ecocitizenship school that welcomes more than a 100 students from pre-kindergarten to middle school in Paris 19th.

In this extraordinary school, children (like adults) are invited to fulfill their potential and evolve in a very positive climate of non-judgment.

Each year, the children and team achieve academic learning by conducting "Projects for the Planet" (waste collection, reforestation, safeguarding endangered species, solidarity internationally and at home...).

Everyone realizes that they can, at their level, through their position and their action, contribute to a better world. Our school is also a school for adults (parents and education professionals, Qualiopi-certified training center), because setting an example is key in the development and education of younger generations.
